

INTRODUCTION:

ESTATE MANAGEMENT

Estate management is the comprehensive administration, operation, and oversight of real estate properties and assets. Estate management encompasses the administration and supervision of real estate properties across various sectors, including government, private organizations, and residential buildings categorized into Types 1 to 8 quarters.

When considering specific criteria such as government employees, elite establishments, and private entities, estate management can be tailored to meet the unique needs and expectations of each category:

- **Government Employees:** Estate management for government employees ensures safe, convenient, and compliant living spaces. Properties are secure, private, and close to government offices. Regular maintenance and good tenant communication keep standards high, providing a comfortable living environment for government employees and their families.
- **Elite Establishment:**
- **Private Entities:** Estate management for private entities involves managing privately-owned properties with a focus on practical and personalized care. It includes maintaining the property, handling financial aspects efficiently, and adapting services to the owner's specific needs. The aim is to ensure smooth operations, preserve property value, and deliver a tailored management experience that suits the owner's preferences.

ESTATE MANAGEMENT SYSTEM

In this project the Estate Management has been divided into three modules named as:

➤ **ASSETS MANAGEMENT: -**

Keep track of properties and their values. This includes scheduling maintenance and repairs, as well as getting reports on asset performance.

➤ **ALLOTTMENT OF ASSETS:-**

Manage allocation of housing to individuals or families. This involves tracking availability and occupancy of quarters, as well as automating the allocation process.

➤ **RECOVERY OF RENT OR FEE:-**

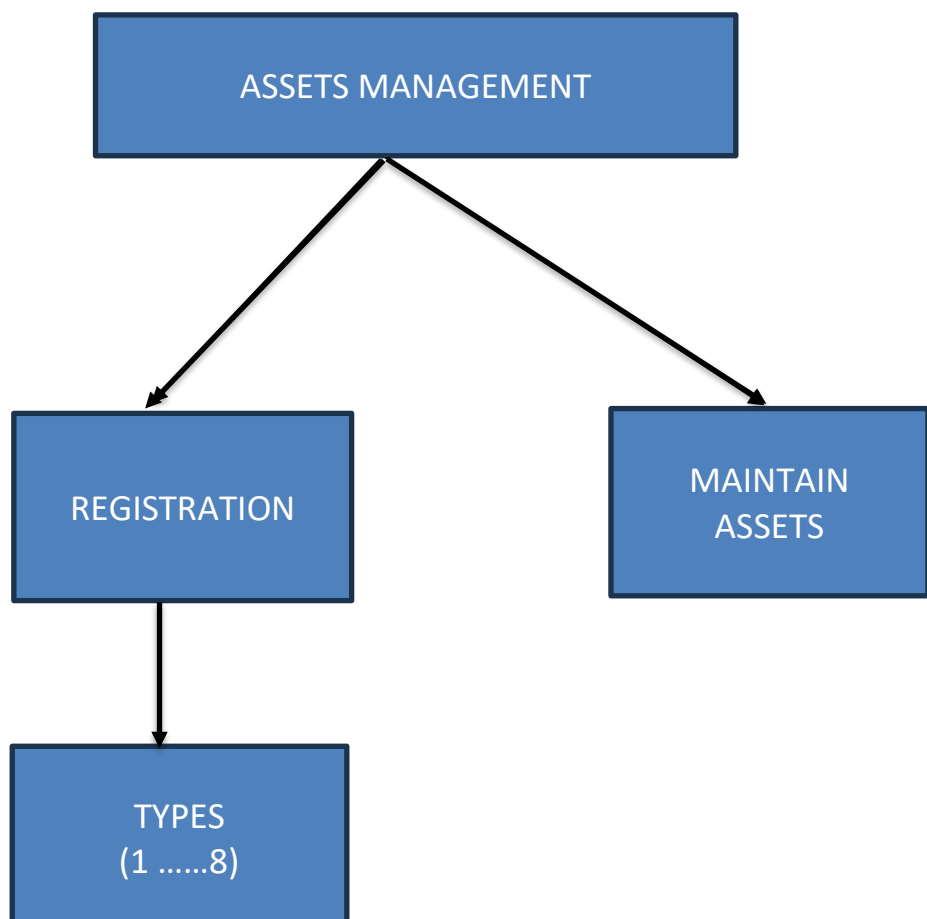

Calculate and collect rent from tenants. This includes tracking payments and debts, as well as getting reports on financial performan

CONCEPTUAL SCHEMA

ENTITIES AND ATTRIBUTES

This section of the document explains the entities used in the project, their attributes and how they will work together. Basically, this is intended to make the design more easy and understandable for everyone. By defining these entities and their attributes, and showing how they interconnect, this section aims to clarify the system's design. It ensures that all components are easily understood and efficiently managed, providing a comprehensive overview that simplifies the overall design for everyone involved.

ENTITIES:-

- ASSETS MANAGEMENT
- ALLOTTMENT OF ASSETS
- RECOVERY OF RENT OR FEE

ASSETS MANAGEMENT:-

Asset management is the systematic process of developing, operating, maintaining, and selling assets in a cost-effective manner. It includes two main components:

- i. Registration: Categorizing and tracking assets by assigning them specific types, usually Type 1 to 8.
- ii. Maintenance: Ensuring assets remain functional and efficient through regular inspections, repairs, and upgrades.

ATTRIBUTES:-

| Name | Data Type | Type |
|----------|-----------|-----------------------|
| id | integer | Primary key attribute |
| Estate | varchar | Non_key attribute |
| Type | varchar | Non_key attribute |
| Qtrno | varchar | Non_key attribute |
| Floor | varchar | Non_key attribute |
| NoOfRoom | varchar | Non_key attribute |
| AvlRoom | varchar | Non_key attribute |

ALLOTTMENT OF ASSETS:-

Allotment of Assets involves the distribution and assignment of assets to various departments, teams, or individuals within an organization. This process ensures that resources are allocated efficiently to meet operational needs and support organizational goals.

i. Allotment Of Quarters: Allotment of Quarters refers to the process of assigning residential spaces (quarters) within a property or estate to individuals or families. This is typically done based on criteria such as need, eligibility, and availability.

ii. Temporary Booking Of Selected Location: Temporary Booking of Selected Location involves reserving a specific property or part of an estate for short-term use. This could be for temporary residents, guests, or special events.

ATTRIBUTES:-

ALLOTTMENT OF QUARTERS

| Name | Data Type | Type |
|--------------------|------------------|-----------------------|
| TNo | varchar | Primary_key attribute |
| Quarters_No | varchar | Non_key attribute |
| Name | varchar | Non_key attribute |
| Designation | varchar | Non_key attribute |
| Section | varchar | Non_key attribute |
| Establishment | varchar | Non_key attribute |
| Basic | varchar | Non_key attribute |
| Categorized_By | varchar | Non_key attribute |
| Appointment | date | Non_key attribute |
| BirthDate | date | Non_key attribute |
| Present_Qtrs | varchar | Non_key attribute |
| Choice_Qtrs | varchar | Non_key attribute |
| Earlier_changeover | varchar | Non_key attribute |
| Surrendered_Qtrs | varchar | Non_key attribute |
| Service | varchar | Non_key attribute |
| Contact | varchar | Non_key attribute |

TEMPORARY BOOKING OF SELECTED LOCATION

| Name | Data Type | Type |
|-------------------|-----------|-----------------------|
| TNo | varchar | Primary_key attribute |
| Name | varchar | Non_key attribute |
| Designation | varchar | Non_key attribute |
| Section | varchar | Non_key attribute |
| Establishment | varchar | Non_key attribute |
| Location | varchar | Non_key attribute |
| Bookingdate | date | Non_key attribute |
| Bookingpurpose | varchar | Non_key attribute |
| Contactno | varchar | Non_key attribute |
| Authorizedby | varchar | Non_key attribute |
| Otherdetails | varchar | Non_key attribute |
| Advpaymentdetails | varchar | Non_key attribute |

RECOVERY OF RENT OR FEE:-

- License Fee: Charge for the right to use or occupy a property, based on size and location.
- Conservancy Fee: Payment for maintenance of common areas, covering cleaning and upkeep.
- Water Fee: Cost based on water consumption, measured by meters.
- Electricity Fee: Charge based on electricity usage, measured by meters.
- Miscellaneous Fees: Additional charges for other services or amenities, such as parking, garbage collection, or administrative fees.

Dues and Defaulters:-

- Dues: Any unpaid fees are recorded as outstanding amounts.
- Defaulter Form: Used to identify and manage individuals or entities that have not paid their dues. It includes details of the outstanding amount and actions required to settle the payment.

ATTRIBUTES:-

FOR RENT CALCULATION

| Name | Data Type | Type |
|-------------|------------------|-----------------------|
| TNo | varchar | Primary_key attribute |
| Lfee | float | Non_key attribute |
| Cfee | float | Non_key attribute |
| Wfee | float | Non_key attribute |
| Efee | float | Non_key attribute |
| Mfee | float | Non_key attribute |
| Arr | float | Non_key attribute |
| Total | float | Non_key attribute |

FOR DUES

| Name | Data Type | Type |
|-------------|------------------|-----------------------|
| TNo | varchar | Primary_key attribute |
| Arr | float | Non_key attribute |
